A new book about integrating trees, animals, and forages

Silvopasture

Silvopasture, the sustainable production of livestock, trees, and forage on the same unit of land, provides an alternative to poorly managed woodland livestock paddocks. This guide was developed as a photographic resource for farmers, foresters, and extension professionals to utilize when considering silvopasture practices in the region.

Silvopasture :: Steve Gabriel, Eric
Toensmeier books ...

Silvopasture (Latin, silva forest) is the
practice of integrating trees, forage, and
the grazing of domesticated animals in a
mutually beneficial way. It utilizes the
principles of managed grazing, and it is one
of several distinct forms of agroforestry.

Silvopasture is the intentional integrated management of trees, forages and grazing livestock for a production benefit. Two approaches to silvopasture allowing livestock to graze in a natural woodland area without active livestock and forage grazing management is NOT considered agroforestry.

Silvopasture | UMN Extension

What is silvopasture? Silvopasture is a farming method that has the potential to relieve some of the planet's biggest environmental problems. Estimates suggest that has the capacity to reduce carbon dioxide by 31.19 gigatons of and the potential for over \$650 billion in economic savings.
