In his foreword to A Dream Foreclosed, Clarence Lusane reminds us of the past struggles of black people in America for fair housing. Dr. Dr. Martin Luther King, Jr. was key in organizing for the Fair Housing Bill of 1968, and was instrumental in President Lyndon B. Johnson's signing the bill into law on April 11, 1968—sadly, seven days after King's assassination.

"Real-life stories of how banks are ravaging the country—particularly African American communities—and how some families have joined together to fight back. The ongoing economic crisis has created one of the longest and largest mass displacements in U.S. history. While profiting from government bailouts, banks have evicted more than ten million Americans from their homes, destroying their life savings, their economic security and their dreams. Told through the eyes of four families, A Dream Foreclosed reveals the ongoing human tragedy of the crisis—and the spectacular possibilities that emerge when everyday people challenge the all-powerful corporations that the U.S. government considers 'too big to indict.'"—Cover p. "Essential reading." —New York Review of Books In the spirit of Evicted, Bait and Switch, and The Big Short, a shocking, heart-wrenching investigation into America's housing crisis and the modern-day robber barons who are making a fortune off the backs of the disenfranchised working and middle class—among them, Donald Trump and his inner circle. Two years before the housing market collapsed in 2008, Donald Trump looked forward to a crash: "I sort of hope that happens because then people like me would go in and buy," he said. But our future president wasn't alone. While millions of Americans suffered financial loss, tycoons pounced to heartlessly seize thousands of homes—their profiteering made even easier because, as prize-winning investigative reporter Aaron Glantz reveals in Homewreckers, they often used taxpayer money—and the Obama administration's promise to cover their losses. In Homewreckers, Glantz recounts the transformation of straightforward lending into a morass of slivered and combined mortgage "products" that could be bought and sold, accompanied by a shift in priorities and a loosening of regulations and laws that made it good business to lend money to those who wouldn't be able to repay. Among the men who laughed their way to the bank: Trump cabinet members Steve Mnuchin and Wilbur Ross, Trump pal and confidant Tom Barrack, and billionaire Republican cash cow Steve Schwarzman. Homewreckers also brilliantly weaves together the stories of those most ravaged by the housing crisis. The result is an eye-opening expose of the greed that decimated millions and enriched a gluttonous few.

From 2007 to 2012, almost five percent of American adults—about ten million people—lost their homes because they could not make mortgage payments. The scale of this home mortgage crisis is unprecedented—and it's not over. Foreclosures still displace more American homeowners every year than at any time before the twenty-first century. The dispossession and forced displacement of American families affects their health, educational success, and access to jobs. It continues to block any real recovery in the hardest-hit communities. While we now know a lot about how this crisis affected the global economy, we still know very little about how it affected the people who lost their homes. Foreclosed America offers the first representative portrait of those people—who they are, how and where they live after losing their homes, and what they have to say about their finances, their neighborhoods, and American politics. It is a sobering picture of Americans down on their luck, and of a crisis that is testing American democracy.

In the aftermath of the 2008 financial crisis, more than 14 million U.S. homeowners filed for foreclosure. Focusing on the hard-hit Sacramento Valley, Noelle Stout uncovers the predacious bureaucracy that organized the largest bank seizure of residential homes in U.S. history. Stout reveals the failure of Wall Street banks' mortgage assistance programs—backed by over \$300 billion of federal funds—to deliver on the promise of relief. Unlike the programs of the Great Depression, in which the government took on the toxic mortgage debt of Americans, corporate lenders and loan servicers ultimately denied over 70 percent of homeowner applications. In the voices of bank employees and homeowners, Stout unveils how call center representatives felt about denying appeals and shares the fears of families living on the brink of eviction. Stout discloses the impacts of rising inequality on homeowners—from whites who felt their middle-class life unraveling to communities of color who experienced a more precipitous and dire decline. Trapped in a Kafkaesque maze of mortgage assistance, borrowers began to view debt refusal as a moral response to lenders, as seemingly mundane bureaucratic dramas came to redefine the meaning of debt and dispossession.

Abramovitz argues that welfare reform has penalized single motherhood; exposed poor women to the risks of hunger, hopelessness, and male violence: swept them into low paid jobs, and left many former recipients unable to make ends meet."

NOW IN PAPERBACK The "gripping" (New York Times) and "Hitchcockian"(Publishers Weekly) story of how a nurse, a car dealership worker, and a forensic expert took on the nation's largest banks A Kirkus Reviews and The Week best book of the year, David Dayen's Chain of Title is a riveting work that recalls A Civil Action, Erin Brockovich, and Flash Boys, recounting how three ordinary Floridians—a car dealership worker, a cancer nurse, and an insurance fraud specialist—helped uncover the largest consumer crime in American history, challenged the most powerful institutions in America, and—for a brief moment—brought the corrupt financial industry to its knees. Lisa Epstein, Michael Redman, and Lynn Szymoniak did not work in government or law enforcement. They had no history of anticorporate activism. Instead they were all foreclosure victims, and while struggling with their shame and isolation they committed a revolutionary act: closely reading their mortgage documents, discovering the deceit behind them, and building a movement to expose it. Harnessing the power of the Internet, they revealed how the financial crisis and subsequent recession were fundamentally based upon a series of frauds that kicked millions out of their homes because of false evidence by mortgage companies that had no legal right to foreclose. As Rolling Stone's Matt Taibbi noted: "Chain of Title is a sweeping work of investigative journalism that traces the arc of a criminally underreported story in America, the collapse of the rule of law in the home mortgage industry."

LONGLISTED FOR THE 2019 NATIONAL BOOK AWARD FINALIST, 2020 PULITZER PRIZE IN HISTORY By the late 1960s and early 1970s, reeling from a wave of urban uprisings, politicians finally worked to end the practice of redlining. Reasoning that the turbulence could be calmed by turning Black city-dwellers into homeowners, they passed the Housing and Urban Development Act of 1968, and set about establishing policies to induce mortgage lenders and the real estate industry to treat Black homebuyers equally. The disaster that ensued revealed that racist exclusion had not been eradicated, but rather transmuted into a new phenomenon of predatory inclusion. Race for Profit uncovers how exploitative real estate practices continued well after housing discrimination was banned. The same racist structures and individuals remained intact after redlining's end, and close relationships between regulators and the industry created incentives to ignore improprieties. Meanwhile, new policies meant to encourage low-income homeownership created new methods to exploit Black homeowners. The federal government guaranteed urban mortgages in an attempt to overcome resistance to lending to Black buyers – as if unprofitability, rather than racism, was the cause of housing segregation. Bankers, investors, and real estate agents took advantage of the perverse incentives, targeting the Black women most likely to fail to keep up their home payments and slip into foreclosure, multiplying their profits. As a result, by the end of the 1970s, the nation's first programs to encourage Black homeownership ended with tens of thousands of foreclosures in Black communities across the country. The push to uplift Black homeownership had descended into a goldmine for realtors and mortgage lenders, and a ready-made cudgel for the champions of deregulation to wield against government intervention of any kind. Narrating the story of a sea-change in housing policy and its dire impact on African Americans, Race for Profit reveals how the urban core was transformed into a new frontier of cynical extraction.

On Melbanen Drive just west of Atlanta, sunlight falls onto a long row of well-kept lawns. Two dozen homes line the street; behind them wooden decks and living-room windows open onto vast woodland properties. Residents returning from their jobs steer SUVs into long driveways and emerge from their automobiles. They walk to the front doors of their houses past sculptured bushes and flowers in bloom. For most people, this cozy image of suburbia does not immediately evoke images of African Americans. But as this pioneering work demonstrates, the suburbs have provided a home to black residents in increasing numbers for the past hundred years—in the last two decades alone, the numbers have nearly doubled to just under twelve million. Places of Their Own begins a hundred years ago, painting an austere portrait of the conditions that early black residents found in isolated, poor suburbs. Andrew Wiese insists, however, that they moved there by choice, withstanding racism and poverty through efforts to shape the landscape to their own needs. Turning then to the 1950s, Wiese illuminates key differences between black suburbanization in the North and South. He considers how African Americans in the South bargained for separate areas where they could develop their own neighborhoods, while many of their northern counterparts transgressed racial boundaries, settling in historically white communities. Ultimately, Wiese explores how the civil rights movement emboldened black families to purchase homes in the suburbs with increased vigor, and how the passage of civil rights legislation helped pave the way for today's black middle class. Tracing the precise contours of black migration to the suburbs over the course of the whole last century and across the entire United States, Places of Their Own will be a foundational book for anyone interested in the African American experience or the role of race and class in the making of America's suburbs. Winner of the 2005 John G. Cawelti Book Award from the American Culture Association. Winner of the 2005 Award for Best Book in North American Urban History from the Urban History Association.

NEW YORK TIMES BESTSELLER □ LONGLISTED FOR THE NATIONAL BOOK AWARD □ One of today's most insightful and influential thinkers offers a powerful exploration of inequality and the lesson that generations of Americans have failed to learn: Racism has a cost for everyone—not just for people of color. LONGLISTED FOR THE ANDREW CARNEGIE MEDAL □ "This is the book I've been waiting for."—Ibram X. Kendi, #1 New York Times bestselling author of How to Be an Antiracist Heather McGhee's specialty is the American economy—and the mystery of why it so often fails the American public. From the financial crisis of 2008 to rising student debt to collapsing public infrastructure, she found a root problem: racism in our politics and policymaking. But not just in the most obvious indignities for people of color. Racism has costs for white people, too. It is the common denominator of our most vexing public problems, the core dysfunction of our democracy and constitutive of the spiritual and moral crises that grip us all. But how did this happen? And is there a way out? McGhee embarks on a deeply personal journey across the country from Maine to Mississippi to California, tallying what we lose when we buy into the zero-sum paradigm—the idea that progress for some of us must come at the expense of others. Along the way, she meets white people who confide in her about losing their homes, their dreams, and their shot at better jobs to the toxic mix of American racism and greed. This is the story of how public goods in this country—from parks and pools to functioning schools—have become private luxuries; of how unions collapsed, wages stagnated, and inequality increased; and of how this country, unique among the world's advanced economies, has thwarted universal healthcare. But in unlikely places of worship and work, McGhee finds proof of what she calls the Solidarity Dividend: the benefits we gain when people come together across race to accomplish what we simply can't do on our own. The Sum of Us is not only a brilliant analysis of how we arrived here but also a heartfelt message, delivered with startling empathy, from a black woman to a multiracial America. It leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game.
