Taxonomy:
Affective Domain
- University of
Warwick
The affective
domain was later

addressed in 1965 in Taxonomy of educational objectives: Handbook II: Affective domain (Krathwohl, D.R., Bloom, B.S., and Masia, B.B.). Affective Domain. The affective domain involves our feelings,

emotions, and attitudes. This domain includes the manner in which we deal with things emotionally, such as feelings, values, appreciation, enthusiasms, motivations, and attitudes. This

domain is categorized into 5 subdomains, which include: Receiving; Responding ...

Affective Domain - Bloom's Taxonomy

The Taxonomy of Educational Objectives, known as Bloom's

Taxonomy (Bloom, Engelhart, Furst, & Krathwohl, 1956) is one of the most recognized learning theories in the field of education. Educators often use Bloom's Taxonomy to create learning

Affective Bloom's

Taxonomy: The cognitive domain

- Teaching and

...

Krathwohl and Bloom proposed the affective domain in 1964 (8 years after the cognitive domain). Like the cognitive

domain, it too divides its objectives into hierarchical subdivisions. This domain addresses the issues of the emotional component of learning and ranges from a basic willingness to

receive
information to
the integration
of beliefs,
ideas, and
attitudes.

Blooms taxonomy is a set of three hierarchical

models used to

Bloom's taxonomy
is a set of
three
hierarchical
models used to
classify
educational
learning
objectives into
levels of
complexity and
specificity. The
models organize

learning objectives into three different domains: Cognitive, Affective and Sensory/Psychomotor.

What Are The Three Domains Of Bloom's Taxonomy?

Bloom and

associated scholars found that the original Taxonomy addressed only part of the learning that takes place in most educational settings, and developed complementary taxonomies for

the Affective Domain (addressing values, emotions, or attitudes associated with learning) and the Psychomotor Domain (addressing physical skills and actions).
