13) How does particle size affect a molecule's transport across a cell membrane? a) Particle size is less important than particle shape for calculating transport speed. b) It is easier for small molecules to diffuse across the cell membrane.

Cell Transport Test Review Questions (ID: 148229)

A selectively permeable cell membrane is one that allows certain molecules or ions to pass through it by means of active or passive transport. Explain two functions of the cell membrane. The cell membrane is a very important structure which functions to allow certain substances to enter or leave the cell.
