I owned a 2009 Chevrolet Uplander and found it completely uninspiring, but that being said if you need a cheap mini van and could get one at a low enough price I would not necessarily advise against buying one. The 3.9 Liter engine is a gas guzzler but it is powerful and performs well. The interior is cheap plastic and looks and feels awful.

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 2011/2012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an exposé of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can't beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

What if you were told that you might possibly spend the rest of your life in a wheelchair? Oh, and you are HIV positive too! And, only a few seemed to care? More Than a Wheelchair; More than HIV is a story, my story, of survival of AIDS in the years after 2000 and having to cope with the challenges it presented me. It is so disturbing and disheartening to see the growing indifference toward HIV and to have a younger generation oblivious and unconcerned by its possible resurgence as a life-altering moment in their carefree lives. I was told that I was going to die numerous times in November 1999, but I astounded them first by recovering and then with my determination and use of imagination in

my therapies and exercises hoping to regain what I had lost at the beginning of my bout with PML (Progressive Multifocal Leucoencephalopathy). I usually explain PML as like having a stroke. It is the simplest explanation. The PML had taken so much from me which left me to re-build my shattered life piece by piece and this book highlights the various obstacles I had to overcome to attain my goals. Every barrier presented to me brought a new round of flashbacks of my childhood, my career and my happy-go-lucky gay life. As I improved, every hurdle inspired me to write my thoughts. Many things have changed since I first faced the onset of AIDS - new forms of treatments, new drugs and new hope, as well as indifference and attitudes. This story can be used for any physical challenge but gives a more human feel to the HIV/ AIDS crisis which seems to be almost forgotten which should be a source of concern to everyone
