The requirements for a given year to be a leap year are:

- 1) The year must be divisible by 4
- 2) If the year is a century year

Read Book Computer Programming First Year

(1700, 1800, etc.), the year must be evenly divisible by 400. Some example leap years are 1600, 1712, and 2016.

Write a program that takes in a year and determines whether that year is a leap year.
