Craniosacral therapy is a form of bodywork or alternative therapy that uses gentle touch to palpate the synarthrodial joints of the cranium. It is based on fundamental misconceptions about the physiology of the human skull and is promoted as a cure-all for a variety of health conditions. CST was invented in the 1970s by John Upledger, an osteopathic physician, as an offshoot of cranial osteopathy, which had been devised in the 1930s by William Garner Sutherland. CST is a pseudoscience, and its p
