Hemophilia: "The Royal Disease"

Abstract. This case deals with the genetics of the hemophilic condition that afflicted the royal families of Europe. Students trace the pedigrees of the descendants of Queen Victoria and the passage of the recessive X-linked trait from ancestor to ancestor. The case is suitable for courses in general biology at either the high school or college level.

Hemophilia - National Center for Case Study Teaching in ...

Fortunately, Leopold was the only one of Victoria's sons who suffered from hemophilia. Her other three sons, Edward, Alfred, and Arthur, were unaffected. Since the present royal family of England descended from Edward VII, the first son, it is free from hemophilia.
