It then goes on to present how they can circumvent the gatekeepers, so they can go directly to the source to see and hear the raw data; hunt for patterns, including refining your individual and collective pattern recognition capability; "connect the dots" among issues that may initially seem unrelated, but in fact, have a great deal in common; give front-line employees training in a communication technique; encourage useful mistakes, including create a "Red Pencil Award"; and watch the game film, where leaders reflect systematically on their own organization's conduct and performance, as well as on the behavior and performance of competitors.
