This collection of short stories and prose chronicles events observed by the author during her lifetime in Northern New Mexico. Family, relatives, friends and strangers (real or imaginary) are caught off guard in everyday occurrences that evoke laughter, tears, or memories of the past. The names have, of course, been changed, and much embellishment has been added to stories which may or may not be true. Stories of innocence, family dynamics, relationships and injustice combine to bring a tongue in cheek narrative to the reader. The author adds: “ My inner barrio is full of observations, whether from the neighborhood where I grew up in Santa Fe or from watching ordinary people interact

I try to see the humor in whatever life throws at us and hope some of these stories will bring a chuckle or a hearty laugh to anyone willing to let their guard down as they read on. ” Born in Santa Fe, MARIE ROMERO CASH is an award-winning folk artist/santera who has been exhibiting her colorful works for over thirty years. She is also a writer, having authored several books on Northern New Mexican culture, shrines, saints and churches including: BUILT OF EARTH AND SONG: A GUIDEBOOK TO NORTHERN NEW MEXICO ' S VILLAGE CHURCHES; LIVING SHRINES: DEVOTIONAL SPACES IN NORTHERN NEW MEXICO HOMES; SANTOS, A COLORING BOOK OF NEW MEXICO SAINTS (also from Sunstone Press); and her memoir about growing up in Santa Fe, TORTILLA CHRONICLES.

The color photographs and illustrations appearing in select monographs over the

past decade represent a significant advance in surgical communication. Previously, black and white renderings were standard because color printing had not been perfected and its cost was prohibitive. We believe the gradual change from black and white etchings and reproductions to detailed color illustrations represents a tremendous twentieth century achievement. In our own urologic practices it became evident that the use of black and white sketches for teaching operative urology, while helpful, left too much to the surgeon's imagination. Even the dimension of depth, produced by varying the intensity of shading, often was inadequate in demonstrating subtle surgical details in a fossa or bed. Since color photography recently has been used to demonstrate operative techniques, we climbed on the bandwagon and photographed in color many of the major operative procedures. However, the

Reflection of light caused by normal tissue fluid significantly reduces the clarity of photographs. Not infrequently, the crucial operative step is obscured by light reflected on a trickle of blood. Even when meticulous care is taken to irrigate and clean the surgical field, the tissue sheen obscures portions of the field. Color paintings by a gifted artist are not only unique, but can be extraordinary; the vividness with which subtleties can thus be portrayed cannot be matched by photography, black and white or color.
