Lashings are used to join together poles or spars to enable the construction of objects and structures. In Scouting this activity is called pioneering. Common pioneering projects include gateways, bridges and platforms, or smaller camp items such as washstands, chairs, benches and tables. See the factsheet on pioneering for more information.

Simple lashings - Scouts
Scout Manual Lashing The diagonal lashing gets its name from the fact that the wrapping turns cross the poles diagonally. The diagonal lashing can be used to bind poles that cross each other from 90° to 45°. If the angle between the poles is less than 45° a shear lashing should be used. The Six Boy Scout Knots version: 8-20-01
